- of recipes)
- 3-4 tomatoes
- 1 or 2 anchovies (salt-packed is the best choice,

2. After this time throw away the soaking water and put the grass peas in a pot with about 1 liter of cold water, the clove of garlic and the bay leaf, and start to boil. When the water starts to boil, count about 40 minutes (but in some cases it could take longer, read the package). Season with salt just after the first 30 minutes.
3. After 20 minutes that the grass peas are boiling, take another pot and heat a generous amount of extra virgin olive oil, then add the onion cut very small and the anchovies, and let it simmer until the onion is soft. Then add the tomatoes cut in pieces (but remove the seeds before), add a ladle of boiling water from the grass peas and let it simmer some minutes.
4. Drain the grass peas (remove the garlic and the bay leaf but keep their boiling water) and add them to the tomatoes. Mix well together, add the pasta and cover with some of the water in which you have boiled the grass peas (just enough to cover the pasta). Set the heat on medium/high and keep stirring until the pasta is cooked. If needed add some water.
5. When the pasta is cooked switch off the heat, add some freshly chopped parsley and freshly grated Pecorino cheese at your taste, mix all together.

## RYE FLOUR M&M's BISCUITS

Starter  
 Main course  
 Dessert

### Ingredients

- 125 grams of butter
- 75 grams of brown sugar
- 75 grams of white sugar
- 1 egg
- 2 teaspoons vanilla essence
- 140 grams of rye flour
- 1/2 teaspoon of salt
- 1/2 teaspoon of baking soda
- 200 grams M&M's with peanuts

### Method

1. Take the butter out the fridge the night before, because you will need the butter soft.
2. You need two bowls. In one of them, mix the two sugars with the butter. In another bowl, mix the dry ingredients (flour, bicarbonate and salt).
3. Mix the sugars with the butter. Add the egg and vanilla essence...
4. ... and beat again for one more minute, so that, everything will be integrated.
5. Add the dry ingredients (flour, bicarbonate and salt) and mix them with a spatula.
6. When we no longer see traces of flour in the mixture we mix well again with the spatula. They are distributed throughout the dough.
7. Next we will distribute balls of dough on the baking tray. I make them with a small ice cream scoop because in that way it is more comfortable, but you can make them with two spoons, they do not have to be a perfect sphere! Each cookie is more or less a spoonful of dough.
8. Distribute the balls of dough on the tray, separated, so that they do not join together when baking. Be careful don't put too many M&M's in the first balls.
9. Put them in the oven, preheated to 190° C, for approximately 10 minutes! Or until they look golden brown 😊
10. Finally, transfer them to a rack to cool completely and enjoy them!
